EDUCATION

PDA College of Engineering

Bachelor of Engineering

Kalaburagi, Karnataka

2021 – 2025

Gurukul Independent PU College of Science

Higher Secondary Education

Kalaburagi, Karnataka

2019 – 2021

The Nobel Boys High School

Secondary Education

Kalaburagi, Karnataka

2009 – 2019

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks Libraries: Spring Boot, React.js, React Native, Node.js, Express.js

Databases: SQL, MongoDB, PostgreSQL

Developer Tools: Vercel, Stripe, Git, GitHub, Docker, Atlas, Figma

EXPERIENCE

Software Engineer Intern

Cascade Technologies Solutions

2024 – 2025 (6 months)

Remote

- Engineered a scalable, full-stack E-Learning platform, *Sparkids*, utilizing a microservices architecture with **Spring Boot** for the backend and a modern user interface with **React.js**.
- Designed and implemented a comprehensive set of **RESTful APIs** to manage course content, user data, and authentication.
- Developed a secure user authentication and authorization system using **JWT** (JSON Web Tokens), enhancing data security and access control.
- Integrated both **MySQL** and **MongoDB** databases, optimizing data storage for structured user information and flexible, scalable course content, respectively, to ensure high performance and reliability.

PROJECTS

Portfolio

Sparkids: Full-Stack E-Learning Platform | *Java, Spring Boot, React.js, MySQL, MongoDB*

- Architected and built a full-stack e-learning platform.
- Developed a robust backend using **Spring Boot**, creating a suite of RESTful APIs for managing course content, user profiles, and interactive features.
- Designed and built a responsive and intuitive front-end with **React.js**, implementing **state management** and **component-based architecture** for a seamless user experience.
- Implemented secure user authentication and authorization with **token-based authentication**.

AI Interview Assistant | *React.js, GeminiAPI, Shadcn*

- Built and deployed a full-stack AI Interview Assistant with React and Redux, automating the technical screening process through a modern, responsive user interface.
- Utilized the Google Gemini API to parse resumes, generate interview questions, and score candidate performance, creating a fully AI-driven interview experience.
- Developed key features including local data persistence for the interviewer dashboard and a "pause and resume" functionality, ensuring a robust and user-friendly application. Interview results are stored in users browser locally using redux data persistence tools.

CERTIFICATIONS

Java Certificate – Certiport

AWARDS & ACTIVITIES

Second Place – Technovision 2025 competition

Participated in college technical and cultural events; contributed to event organization and student activity coordination
