PROFESSIONAL SUMMARY

Web Developer with expertise in building secure, scalable web applications using React.js, Spring Boot, Spring Security, and Node.js. Proficient in Java and JavaScript. Skilled in creating dynamic user interfaces, optimizing application performance, and building REST APIs with a strong foundation in software development. Experienced in database systems like SQL and MongoDB and cloud services like MongoDB Atlas and Oracle SQL Cloud Storage.

SKILLS

Full-Stack Web Development

- **Backend:** Spring Boot, Node.js, Express.js
- **Frontend:** React.js, JavaScript
- **REST API Development** for dynamic web applications
- **AWS, Render**
- **Spring Security, JWT, Microservices**
- **Database Management:** SQL, MongoDB, MongoDB Atlas
- **Version Control:** Git, GitHub
- **Programming Languages:** C, Java, JavaScript, C++

ADDITIONAL INFORMATION

- **Soft Skills:** Communication, Teamwork, Problem-Solving
- **Languages:** English, Kannada, Hindi
- **Achievements:** Increased team productivity by 20% through process optimization

CERTIFICATIONS

- Java Developer Certificate – Certiport

EDUCATION

The Nobel Boys High School, Kalaburagi (2009 - 2019)

Bachelor of Engineering, PDA College of Engineering (2021 - 2025)

Gurukul Independent Pre-University College of Science, Kalaburagi (2019 - 2021)

EXPERIENCE

Internship at Cascade Technologies Solutions

2024 - Present

Sparkids

- Developed and maintained dynamic, responsive web applications using React.js and Spring Boot, ensuring seamless integration between front-end and back-end technologies to enhance user experience and performance.
- Built RESTful APIs using Spring Boot, enabling efficient communication between the client and server and facilitating data exchange for real-time web applications.
- Optimized application performance by improving front-end loading times and enhancing back-end processing using best practices in React, JavaScript, and Spring Boot, leading to improved user engagement and system efficiency.

MentorConnect

- Designed and implemented the back-end architecture using Spring Boot, creating a robust framework for managing mentor availability and appointments.
- Developed RESTful APIs for core functionalities like availability management and mentor-mentee interactions, ensuring scalability and maintainability.
- Integrated data persistence with a MySQL database to securely store mentor and availability details, supporting complex queries and data relationships

Mini-Project on Cyber Security

2024

- Developed a machine learning model to detect LOL Bins and ADS scripts using Random Forest classifiers and NLP.
 - Enhanced threat detection by integrating NLP for accurate classification of potential security risks.
 - Boosted detection accuracy and efficiency by optimizing the Random Forest classifier.
-
